Ron Brown : Book 1: Candles (The Non-Electric Lighting Series) (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Book 1: Candles (The Non-Electric Lighting Series) (Volume 1):

3 of 3 people found the following review helpful. EnlighteningBy Wm BigelowThe author presents good, solid information at a very reasonable price. Much of the information consists of original research--the writer actually tests various products and compares the results with the established wisdom, frequently with surprising results. I give this

book four stars and not five stars only because it would have been great if the author could have done more "trials" in the research.0 of 0 people found the following review helpful. Everything you might be interested in knowing about candles from ancient times to todayBy Thomas CoffeyWell written and interesting short booklet that is both interesting and informative to someone who is intrigued by ancient to modern candle concepts. Covers solid and liquid candles, the technological evolution of wicks and candles, and concerns for safety throughout.1 of 1 people found the following review helpful. Very practical, no fluff, you'll know what candles to make after reading this.By Brian JackReally got me thinking about different ways to fashion candles from random stuff in my house. I wish there were more details, but this was a great intro for me into practical candle making. I appreciate that he didn't spend time on decorative things, or on candles that aren't efficient. He pretty much explains why tea candles are the way to go. I'm glad I have this in print form for when the power goes out.

This book, Candles, is our first adventure in The Non-Electric Lighting Series. The series is aimed at people who want to survive whatever it is that Mother Nature throws at us next blizzards, blackouts, or Carrington events.This is a series of DIY books (Do It Yourself). And KISS books (Keep It Simple, Stupid). This volume, Candles, is about producing LIGHT. Not aromatherapy. Not ambiance.This book shows you how to make candles; how to improvise candles; how to improvise candleholders. It describes different kinds of wicks and waxes and substitutions. It gives you a leg up, a better-than-even chance of coping when a blackout finds you far from home.But its equally important to know what NOT to do. YouTube has several videos on emergency candles. Some of those videos are in error and pose huge dangers. And YouTube is not alone. What part of FIRETRUCK dont you understand?This book reveals as much folly and as many hazards as possible.
