They are extremely dark in most cases, and it's nearly impossible to tell what the color should be. On pages with a large color key four to six colors look exactly the same. It's impossible to tell what the color should be. I am normally a fan of Brain Game products, but this one is a big disappointment; extremely frustrating. I have hundreds of colored pencils, but can match very few to the color charts in this book. I noticed two others gave this five stars. Their books must have been from a different printing/edition.3 of 3 people found the following review helpful. pictures are 4x6"By KellyI don't know if I just didn't read the description or review close enough, but the pictures are super small and the spaces are ridiculously small. The color palate is far beyond my sharpie ultra fine tipped markers and I would be sharpening my 240 colored pencils more than coloring. I will be returning the book I have not tried to color in yet.1 of 1 people found the following review helpful. Awesome quiet activity for my twin six year oldsBy MichelleMy six year old twins love this book. They have a large set of gel pens that they use with this book and they will sit for hours coloring. I take out the answer pages so that each picture is a

surprise. I highly recommend this book if you are looking for a quiet activity for kids (or adults too haha).

Exercise your brain and your eyes! This book challenges you to fill squares with color to reveal pictures. The book contains 100 pictures to color by pixel. For each picture, you will see a grid on the page, along with a color key. Use the color key to fill in the grid squares and form a beautiful mosaic picture!
