Martyn Barber : Bronze and the Bronze Age: Metalwork and Society in Britain c2500-800 BC before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bronze and the Bronze Age: Metalwork and Society in Britain c2500-800 BC:

1 of 1 people found the following review helpful. How metal working changed societyBy Hallstatt PrinceFour stars.Barber concentrates in this book not on the variety of and classification of bronze age artifacts but the effect on bronze making had on society and on the status of the craftsmen themselves. Mining, smelting casting and deposition

are his main focus here as well as the effect the magic of transformation of metals had on society. There are some interesting meditations here. I personally wish more time was spent on the various types of bronze artifacts made in during this period. I also felt too much time was spent on deposition as it is a subject that has been covered quite extensively in other volumes. Still it is a well written book and I believe worthy of your attention.

Barber concentrates in this book not on the variety of and classification of bronze age artifacts, but the effect bronzemaking had on society and on the status of the craftsmen themselves. Mining, smelting, casting, and deposition are his main focus, as well as the effect the magic of transformation of metals had on society.
