Chad Stone : Building Your Hollow Wood Surfboard before purchasing it in order to gage whether or not it would be worth my time, and all praised Building Your Hollow Wood Surfboard:

1 of 2 people found the following review helpful. DisappointingBy Arne LeisegangNot much more than workshop guidelines a simple how-to stick it all together put in a pretty cover, not really a book at all., nothing on design, history, etc. There is nothing about how to build a fancy fin, as the tail would suggest and only rudimentary hand-drawn diagrams. Quite frankly a bit of a waste of money, especially considering insurance and postage to South Africa.1 of 1 people found the following review helpful. Recommend it!By Greg ZelnerI bought this book and built a surfboard for my wedding to use as a guestbook (everyone signed it). After I received the book I emailed the author to get my free surfboard plans and they were sent immediately. It was an easy build and I am building another surfboard using the plans.

Building Your Hollow Wood Surfboard. A guide to building a hollow cedar surfboard using 1/4" cedar planking covering a thin plywood frame. You also get one free set off blueprints featuring our patented rail construction method, making the building process easier and allowing for a better finished product. Plans are available for instant download with proof of purchase (details inside) and free real time help from the author through email to help you through the build process, along with the Timeless Surf Forum's online community to share information and updates.
