I am new to soap making and so far have not actually made soap. I am reading everything I can and also have almost all the equipment and ingredients I need. I have read several books on soapmaking and some are not easy to follow or read so I am very pleased with this book.0 of 0 people found the following review helpful. Kindle versionBy Maggie OI purchased the kindle version because the price on it was excellent and I didn't want to wait 2 days to make some castile soap. Her research is amazing and I took the plunge today. I made her herb castile soap. I subbed the water with aloe vera juice. I have never been able to unmold my soap without at least 24 hours. I was worried about that with castile soap as so many people talk about waiting 2 weeks just to unmold. Well, it is my fastest unmolding ever. It took all of 4 hours, maybe even less to harden

up. I used hot process method with my crockpot. In love with how it turned out! Infused olive oil with herbs from my garden in addition to chamomile, rose, calendula, and spriula powder. I think I can smell the chamomile still!3 of 3 people found the following review helpful. More Soapmaking!By ShelaghLove Anne Watson's books! She got me off the couch and into the kitchen to make my first batch of soap. She presents recipes and directions simply, clearly, and in manageable batches for the soap hobbist. She also responds to emails immediately. Castile Soapmaking is a brief and concise book with much of the information appearing in her earlier book. Still, I am excited to learn from the master, follow her tips, and try her formulas for castile soapmaking.

SPECIAL NOTE! -- ANNE WILL PERSONALLY ANSWER ANY QUESTION OF YOURS AFTER READING THIS BOOK. ASK ON HER WEB SITE, AND YOU'LL NORMALLY HEAR BACK WITHIN HOURS! For centuries, the name Castile has been associated with the highest quality in soap. But Castile -- made from olive oil, traditionally in factories -- has proven hard to translate to craft soapmaking. It has earned a reputation as difficult to make, slow to cure, and lacking in rich lather. Until now. Anne L. Watson, author of "Smart Soapmaking," continues her soapmaking revolution with the first practical book on making Castile soap bars at home. With the secrets revealed in this advanced guide, you'll be making lovely, quick-curing, lather-rich Castile quickly, safely, and reliably.

//////////////////////////////////// Anne L. Watson is the first author to have introduced modern techniques of home soapmaking and lotionmaking to book readers. She has made soap under the company name Soap Tree, and before her retirement from professional life, she was a historic preservation architecture consultant. Anne and her husband, Aaron Shepard, live in Friday Harbor, Washington. ////////////////////////////////////// CONTENTS GETTING STARTED (Facts and Myths About Castile) THE KEYS TO CASTILE (Moving It from Factory to Kitchen) WHAT DO I PUT INTO IT?
