the following review helpful. CollectionBy s Secret stockholder and investorI am gathering various soap and aromatherapy book for this coming summer. It going to be a project for me and my 12 year old to do.

While this latest book of Kerri Newbury's' may well seem a slight step aside from her usual CP soap and candle crafting instruction books, it certainly follows true to her usual straight forward, easy to follow, no nonsense, plain language style of writing. This book will teach anyone how to create their own silicone and latex rubber soap and candle moulds in no time at all, thereby saving them a great deal of money, while allowing them the opportunity to create their own custom designed soap and candle products as gifts, or for sale to the general public. This book could well be the starting point for anyone looking to begin their own cottage industry, while working from home in the making of, and selling of moulds of all kinds. The price of this book will seem as nothing when you recognise, not only how much money it can save you in the cost of 'Store bought' moulds, but also how much it can increase your future potential income. This book is sure to become yet another runaway success! Once you get started into latex and silicone mould making with the easy to understand and follow instructions in this Kerri Newbury book, youll be looking to buy all the other Know How to Make crafters books in her growing series.
