I love it because I am a fan of the log cabin and this shows exactly how to lay out the blocks to achieve the tree and of course it tells you the colors to purchase for the tree the directions are clear. I like that it suggests different ways to finish the quilt using embroidery thread or gold ribbons to sew in the center of the blocks and add a bell if you would like or the traditional quilting methods, it tells a different way of doing the border after the sandwich is made you add the border sewing thru all thickness of the sandwich, I was impressed with the different suggestions, and it seems each time I purchase a new pamphlet I learn something, I am new to the quilting process but love the books and love seeing all the different ways you can accomplish the end product. 0 of 0 people found the following review helpful.
