Forget duct tape and baling wire now makers can design and manufacture things as beautiful as Apple and as slick as Dyson and Audi. We'll show you how to conceive and visualize great-looking projects with our speed course in industrial design then build them with tools like vacuum forming and laser cutting, and finish them with cases and interfaces that are artful, ergonomic, and irresistible. Plus you'll get 23 great DIY projects like the Nellie Bly Smoker, the Awesome Button, the World Control Panel, LED Little Big Lamp, Laminar-Flow Water Fountain, and Keyless Lock Box, and meet amazing makers like costumer Shawn Thorsson, flying motorcycle builder Deszo Molnar, and more.
