Thom Boswell : Making Decorating Fantastic Frames: More Than 100 Unusual Techniques Projects before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Decorating Fantastic Frames: More Than 100 Unusual Techniques Projects:

Shows how to construct distinctive frames from many different materials. The book presents a range of framing ideas for imaginative alternatives to standard black frames and shop-bought mouldings.

From Library JournalThis unusual and attractive book represents a way for do-it-yourselfers of all ages to create their own picture frames at reasonable costs. Basic construction and assembly techniques are followed by ideas and directions for projects using a wide variety of materials, such as wood, fabric, paper, twigs, earthen casting, stained glass, and metal. Although the instructions for the more elaborate frames are somewhat sketchy, the excellent photographs will inspire other variations for the less talented. This visually striking work, which could double as a coffee-table book, is recommended for all public libraries that have no recent books on the subject.- January Adams, ODSI Research Lib. , Raritan, N.J.Copyright 1993 Reed Business Information, Inc.
