Peter Fronteddu, Stefan Steigerwald : Making Integral Knives before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Integral Knives:

0 of 0 people found the following review helpful. Eh, not thrilledBy scott frazierDissapointed this book has nothing on the forging process of integral blades.0 of 0 people found the following review helpful. Five StarsBy David G. LavondIncludes designs, construction and treatments that I have not seen elsewhere.0 of 0 people found the following review helpful. Five StarsBy Richard Weathersgreat book

The next installment to this knife workshop series explains how to design and build an integral knife, a knife made out of a single piece of steel. From basic patterns and principles to technical solutions to various variations in design and process, this guide is ideal for the intermediate to advanced knifemaker. Through step-by-step instructions and images, three integral knife projects with varying levels of difficulty are explained. Learn how to make a hand-filed knife that doesn't require much equipment, a knife made using a milling machine, and a knife made with a piece of steel that has been professionally prepared with a wire-erosion process. With 350 photos and illustrations, this comprehensive guide is ideal for mastering how to make integral knives.

About the Author Stefan Steigerwald is one of the most prominent knifemakers in Germany. Peter Fronteddu is an established knife expert. He has written and photographed several volumes in this workshop series.
