Delightful By Bellina There are so many fun little projects in this book. The explanations are clear and the photos are great. It's a book of inspiration but also a book of directions so your inspiration can be taken to the next level. Highly recommend it if you're interested in expanding your miniature repertoire!

From a charming French caf to an Arabian tent decorated with exotic rugs and wall hangings, this delightful

compilation of 22 unique projects, done in standard 1/12 size, will enchant doll house enthusiasts and other miniaturists. All that's needed is some basic equipment and the desire to create imaginative miniature worlds. A Swedish Bedroom features red-and-white gingham fabric throughout, while the Floral Morning Room has scented forget-me-not wallpaper and a doll seated at a tiny skirted table set for tea. You can also craft a greenhouse, Japanese garden, general store, or theater box, along with pretty polymer clay people to populate each lovely space you make.
