This volume presents a selection from the classic literature on the tapestry, providing a comprehensive companion to its study. The articles have been carefully chosen in order to provide a strong, balanced coverage of most aspects of the tapestry; all the major themes - the material fabric of the artefact, its origin, its relation to other early sources, its visual language, the form and function of the inscriptions, the work's general meaning and purpose, and the way it was

perceived - are discussed in authoritative contributions collected here. The volume also includes substantial new essays by the editor on studying the Bayeux tapestry, and on its origin, art, and message.

This admirable collection of essays contains a well-chosen group of articles from the past two centuries devoted to the interpretation of the Bayeux Tapestry ... As a general editor who has selected well and guided astutely, and as an original contributor with a well-founded and persuasive opinion on many themes, Dr Gameson's achievement is a notable one. --HistoryEleven `classic' studies...allow the reader to trace the development of opinion on, for example, the tapestry's accuracy of historical witness and its relation to other records of the Conquest. The sweep of these essays also makes visible the ways in which scholarly protocols for approaching the enigmatic object have changed over time ... Useful archive. --Medium AevumExcellent volume. --Notes QueriesAbout the AuthorDr RICHARD GAMESON is Lecturer in Medieval History at the University of Kent at Canterbury.
