**Beverly Jollands : Topiaries and Pomanders (Gifts from Nature Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Topiaries and Pomanders (Gifts from Nature Series):

7 of 7 people found the following review helpful. Wonderful ideas and pictures. Beautiful book.By A CustomerThe pictures are wonderful and the directions on how to make the different projects are fairly good although they could be a bit more specific on the quantities and types of dried material required. All in all I highly recommend this book for anyone interested in learning how to make topiaries and pomanders or to get great gift ideas.

Bringing the art of topiary from the garden into the home, Jollands shows how to form a wide variety of sculpted creations using lavender, copper beech, eucalyptus, fresh flowers, dried herbs, autumn fruits and cones. '
