Excellent book for everything you need to knowBy George-yThis is an all encompassing book on what you need to know to successfully machine quilt using your walking foot. Jacquie covers testing and getting to know your walking foot and marking the foot so that you can turn/pivot precisely where you want/need. Spray basting the quilt sandwich is discussed and Jacquie then heat sets the adhesive to remove potential wrinkles/bubbles you can get as you quilt. (I had never heard anyone talk about heat-setting the temporary spray adhesive before but I'll try it soon.) I love the part about using the walking foot with decorative machine stitches. (Who would have thunk it!) I recently used my walking foot and stitched a decorative wavy line (would that be called a serpentine?) to quilt the center of a Christmas table topper that had many 2.5" squares that didn't quite match up to one another (I was finishing up an UFO from previous years). I stitched right over the top of the seam lines. The

decorative stitch is beautiful and you can no longer tell that the squares are wonky. I may not have thought of doing that stitch or using my walking foot if it weren't for Jacquie. Even though most of the information in the book is also discussed in Jacquie's three Craftsy classes, I really like this book because pictures and instructions and is a great reference book. Jacquie is into modern quilting whereas I tend to make mostly traditional quilts. Even with that, I find the techniques very useful. 2 of 2 people found the following review helpful. Get more out of your walking foot

GREAT work, Jacquie! A much needed look at the wonders of the walking foot with great examples, instructions and photos.

Free motion not for you? How about some "forward motion" quilting with the walking foot? It's time to get that walking foot out of the ditch, take it for a drive and see what that baby can really do! Jacquie Gering will be your guide as you work your way from walking foot basics to intricate marked designs as you master machine quilting with your walking foot. In *WALK*, Jacquie shares a comprehensive set of walking foot quilting basics that provide a solid foundation for quilting with ease, quality and creativity. She guides you through a series of test drives with your walking foot, allowing you to get acquainted with its features and set yourself up for success with your foot and your machine. Then you'll learn how to prepare and mark the quilt, prevent puckers while quilting, and manage large projects. Jacquie teaches over forty walking foot friendly designs including channel quilting, matchstick quilting and quilting with decorative stitches. Thought that your walking foot could only be used for straight line quilting? Learn to use the walking foot with traditional designs including cables, clamshells, and orange peels or finish your quilt with intricate point to point designs like the boomerang and nested diamonds. Quilt graphic, innovative radiating designs. Learn to spiral and quilt concentric designs or use your newly developed skills to quilt unique designs with reserve. You too can achieve the textures shared in Jacquie's vibrant, graphic quilts. With a toolbox of simple to complex designs you'll have the options you need to quilt on your home machine with designs that will support your piecing and create a harmonious marriage of piecing and quilting. With a walking foot, you'll find a level of control and success you never thought possible and you'll become as excited about the quilting as you are about your piecing.

"Quilting with a walking foot is well within reach of any quilter with a sewing machine, and Gering's guide will open quilter's eyes to machine quilting possibilities beyond free-motion techniques." (Library Journal)
