**Sara Naumann : Washi Tape Cards (Twenty to Make)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Washi Tape Cards (Twenty to Make):

0 of 1 people found the following review helpful. Five Stars By Eileen Glazier This is a great book if you like making cards with tape. It has a lot of great ideas!!! 0 of 10 people found the following review helpful. Best Watch EVER By I like Tim mcgraw I thought from description it would be different

Homemade cards traditionally involve sticking all sorts of shop-bought embellishments on to card. This book builds

on this tradition, but takes it in new and exciting directions by using all the latest techniques and products. Sara's expertise and background knowledge, coupled with her easy and accessible style, make this book a wonderful introduction to modern mixed-media techniques and products for papercrafters and card-makers of all abilities. The book will contain 20 projects all greetings cards, using a variety of techniques, such as stamping, spray-painting and layering, and widely available materials such as stamps, colour sprays and paints. Sara's passion is for making mixed-media techniques accessible to papercrafters of all abilities, so all the designs will be relatively simple, but very stylish.

November 2014 Washi tape is the latest indispensable material for card makers, and this little book demonstrates how versatile it can be. There are twenty card projects (plus an extra twenty ideas) showing what you can do with a few rolls of tape, plus whatever else you have in your stash. Rubber stamping, punches, dry and heat embossing, die cutting, stencils, embossing paste and more all put the tape through its paces. The designs are all bright and modern, simple and suitable for many occasions. You won't find festival specific cards in here but there are many ideas that can be adapted for the season and occasion. What the book really does is show you how you can extend the papercrafts you already do to involve the new material; what it is capable of, how it looks when stamped on or embossed or die cut etc. Each project has a full page photograph of the finished card, plus a small inset of an alternative as well as instructions, a list of supplies and (very usefully) a list of tools. Many items are the ones most cardmakers already own, and as I perused the book my own creative juices were soon flowing and I was planning how to incorporate the tape with my latest acquisitions. This is a good book as it really shows you what the tape is capable of, how to use it and how to include it with what you already have to hand. If you cannot find a good range of washi tape and papercrafting materials locally try <http://www.searchpress.com> for a list of suppliers. \* Myshelf.com \* April 2016 Washi tape is one of the simplest craft materials around, yet it is also one of the most inspiring. In this recent offering from the Twenty to Make series, papercrafting expert Sara Naumann explains how you can take an array of bright coloured and patterned tapes, then cut, tear, stick, layer, fold, stamp and emboss on it, to create fabulous cards for every occasion. Each project has a full colour image, with step-by-step instructions, plus information on tools and equipment and a few basics to ensure professional results everytime. \* Love to Make \* About the Author Sara Naumann is an American mixed-media artist, writer and workshop instructor. She lives with her husband and small daughter in the Baltic sea town of Sopot, Poland, having moved there after 5 years in Amsterdam. Her passion is for stamping and mixed-media - and she shares that passion through teaching, writing and designing. Her aim is to take the mystery out of things that can seem intimidating or unfamiliar, leaving you free to enjoy the creative process.
